According to the current dividend policy described in the Company’s issuing prospectus, the Managing Board of LiveChat Software S.A. will be recommending to the Annual General Meeting to pay out highest possible part of the profit for the specific fiscal year as dividend, unless the company sees investment opportunities that would give it, and the shareholders, a return higher than the dividend payment.

An advance dividend of PLN 0.89 per share (compared to PLN 0.60 a year ago) was paid out in January 2021. Management proposed second advanced dividend (also 0.89 PLN per share) to be paid in July.

Board intends to recommend AGM to pay dividends in the amount of PLN 3.69 per share (including advances).
Team of 230+

*Including: Marketplace and Knowledgebase
We have noted a significant increase in the number of trials since mid-March. Despite the initial high churn, this translated into an increase in the rate of building the customers’ base. At the end of Q1 2021/22 the number of LiveChat clients grew to 33,358.
Changes in pricing model introduced in January 2020 and other initiatives are expected to have positive impact on ARPU in the coming quarters.
ARPU supported by:
- new pricing model and higher sale price,
- upselling,
- structure of churn (customer churn higher than MRR churn).

*Initial Sale ARPU (or Average Sale Price) is the average MRR of new customers at the moment they convert to a paid account.*
The number of ChatBot customers exceeded 1,000 in January 2020. At the end of June 2021, ChatBot had 2,086 active and paying clients.
The visible increase in the sale price is the effect of introducing new subscription plans.
