LiveChat in times of pandemic

✔ From the week of March 9-15 we introduced a model based 100% on remote work.

✔ No negative effect on our work.

✔ New online recruitment system introduced.

✔ Events such as „Side Project Day“ and „LiveChat Academy“ held online.

✔ HQ re-opened in July, but „remote mode“ still preferred.
Financial results
We have noted a significant increase in the number of trials since mid-March. Despite the high Churn, this translated into an increase in the rate of building the customers base. At the end of the Q1 the number of LiveChat clients grew to 30,391.
Changes in pricing model introduced in January 2020 and other initiatives are expected to have positive impact on ARPU in the coming quarters.
ARPU supported by:
- new pricing model and higher sale price,
- upselling,
- structure of churn.
The number of ChatBot customers exceeded 1,000 in January 2020. At the end of the 1st quarter, ChatBot had 1,350 active and paying clients, as compared with 1,108 at the end of the previous quarter and 660 one year earlier.
The visible increase in the sale price is the effect of introducing new subscription plans.

Usually financial activities include almost only dividends.
According to the current dividend policy described in the company’s issuing prospectus, the Managing Board of LiveChat Software S.A. will be recommending to the Annual General Meeting to pay out highest possible part of the profit for the specific fiscal year as dividend, unless the company sees investment opportunities that would give it, and the shareholders, a return higher than the dividend payment.
